

Satyaprakash Swain

Java Developer

Mobile: 7377010618

Email: satyaprakash.swa.98@gmail.com

Result-oriented professional with experience in **Software Development (Java)**, targeting opportunities in **Application Development (Java)** with an organization of high repute.

Profile Summary

- A competent professional with **over 2 year** of extensive experience as a Java Developer with expertise in developing web- based and enterprise applications using Core Java, J2EE, Hibernate, and Web Services
- Skilled in developing applications using **MVC Architecture, Restful Web Service, OOPs Concept, Collection Framework**, Hibernate, JPA, and Spring Boot.
- **Proficient in developing Restful Web Services** and using tools like Postman
- Capability in **creating Rest Controller class** with Response Entity as a return type and applying Pagination concept and sorting page data by Sort class
- Comprehensive knowledge in using **Model Mapper library to convert Entity object** to DTO and vice-versa and creating a Global Exception Handling class
- Good understanding of web services (SOAP/REST) and related technologies such as **AJAX, JavaScript, HTML, CSS, JSON, XML**
- **Implemented Spring Security for Authentication and Authorization** of Rest APIs and designed JSON Web Tokens (JWT) for secure authentication and authorization
- Installing the application on **AWS EC2 instances** and also configured the storage **S3 buckets**.
- Implemented **Swagger/Swagger** UI to streamline endpoint documentation.
- Understanding of **JDBC, SQL, and Java 8 features** and proficient in developing database queries with MySQL Workbench
- Web Development Skills in designing and developing **RESTful APIs**, following bestpractices for **API design and security**.
- Experienced in troubleshooting, analyzing, and **fixing defects and integrating required APIs** into the application
- Proficient in creating new **Controller, Entity, Repository, and Service Layers, Exception Handling** using Spring Boot and manipulating HTTP Response using Response Entity class

Core Competencies

Software Development (Java)
Reporting & Documentation
Database Operations

Requirement Gathering
Incident Resolution
Cross-functional Coordination

Unit & Incident Testing
Project Planning & Execution
Client Engagement

Technical Skills

Languages: Core Java,

SQL

J2EE Technologies: JDBC, Servlets, JSP,HTML,CSS, JavaScript ,React (Basic)

Application Framework: Spring Core, Spring MVC, Spring Boot, IntelliJ

ORM Framework: Hibernate, JPA **Web Services:** Restful web Services **Database:** MySQL

Servers: Apache Tomcat

IDE: Eclipse, STS

Tools: Postman, MySQL Workbench

Process Type: Agile Scrum Process

Architecture Type: Microservice, (MVC)

Version Control System: GIT & GITHUB

Work Experience

SREST INFORMATION TECHNOLOGY PVT. LTD.

Project -1

Campusive

Team size-7

Description- Campusive is the project focuses on designing and implementing an interactive online platform to enhance Science, Technology, Engineering, and Mathematics (STEM) education for students in middle and high schools. The platform aims to provide a dynamic and engaging learning environment that fosters critical thinking, problem-solving skills, and hands-on experimentation .(**Designed from scratch**)

Highlights:

- Designed and developed an application using Spring MVC architecture and **API**
- Created controller and entity classes and developed the repository layer
- Configured application properties file and implemented services layer with **abstraction** concept
- Developed view using JSP and performed form validation using **Spring validators**
- Implemented repositories for performing database operations in **Spring Boot** and installed **MySQL** Database and created database schema
- Established **Rest Controller** class with **Response Entity** as a return type and implemented Web Services using **RESTful**
- Used GIT and **GITHUB** for version control
- Exposed Web Services as well as consumed Web Services
- Tested **Web Services and microservice** using Postman and integrated email sending services
- Applied **Pagination** concept and sorted page data by Sort class
- Utilized **Model Mapper** library to convert Entity object to DTO and vice-versa
- Attended daily **scrum** meetings and fixed defects communicated by the testers
- Developing **Rest Controller** class with Response Entity as return type.
- Installing the application on **AWS** EC2 instances and also configured the storage S3 buckets.
- Implemented **Swagger/Swagger** UI to streamline endpoint documentation.

Project -2

Project Name: unooma

Description: unooma Api is a **microservice** based technology for displaying all your company's data and interactions with Client and potential customers. The goal is simple Improve business relationships to grow your business. It is a widely-implemented strategy for mapping a company's interactions with people. Unooma Api System helps companies stay connected to Customers, streamline processes, and improve profitability.

Highlights:

- Designed and developed an application using Spring MVC architecture and **API**
- Created controller and entity classes and developed the repository layer
- Configured application properties file and implemented services layer with **abstraction** concept
- Developed view using JSP and performed form validation using **Spring validators**
- Implemented repositories for performing database operations in **Spring Boot** and installed **MySQL** Database and created database schema
- Established **Rest Controller** class with **Response Entity** as a return type and implemented Web Services using **RESTful**
- Used GIT and **GITHUB** for version control
- Exposed Web Services as well as consumed Web Services
- Tested **Web Services and microservice** using Postman and integrated email sending services
- Applied **Pagination** concept and sorted page data by Sort class
- Utilized **Model Mapper** library to convert Entity object to DTO and vice-versa
- Attended daily **scrum** meetings and fixed defects communicated by the testers
- Developing **Rest Controller** class with Response Entity as return type.
- Installing the application on **AWS** EC2 instances and also configured the storage S3 buckets.
- Implemented **Swagger/Swagger** UI to streamline endpoint documentation.

Education

- M C A from Gita Autonomous College, Bhubaneswar with 90%

Personal Details

Languages Known: English & Hindi

Address: Bhubanswar, Odisha
