SUMMARY

Backend Engineer with 3+ years of experience designing, developing, and scaling enterprise-grade microservices using **Spring Boot**. Strong expertise in distributed systems, transactional workflows, and event-driven architectures. Delivered measurable improvements including **performance gain** and **database load reduction** through caching, indexing, and architectural refactoring.

TECHNICAL SKILLS

Languages: Java, JavaScript (Basic)

Backend: Spring Boot, Spring MVC, Hibernate/JPA, Spring Security

Frontend: React (API Integration, Bug Fixing)

Architecture: Microservices, REST APIs

Messaging: Apache Kafka

Database & Caching: PostgreSQL, MySQL, Redis

Cloud/DevOps: AWS, Docker, Jenkins, GitHub Actions, Bitbucket Pipelines, Liquibase, Maven

Testing: JUnit, Mockito

EXPERIENCE

Srest Information Technology Pvt Ltd

Sep 2024 – Present

Java Backend Developer

Noida, India

Owned backend design and architecture of Property and Maintenance microservices including schema design, domain modeling, API versioning, and deployment strategy.

Implemented DDD-based domain modeling with aggregates, repositories, and bounded contexts ensuring scalability and maintainability.

Improved observability by implementing structured logging and monitoring strategies for production environments.

Implemented Spring Security for Authentication and Authorization of Rest APIs and designed JSONWeb Tokens (JWT) for secure authentication and authorization.

Wxit Consultant Services Pvt. Ltd.

July 2023 – Aug 2024

Software Developer

Noida, India

Assisted in the development and maintenance of backend systems, resulting in a positive impact.

Developed and maintained Java-based applications, ensuring adherence to coding standards and best practices

Collaborated with cross-functional teams to gather analyze project requirements, leading to successful project deliveries..

Good knowledge in java and always seeks to find a unique way in problem solving.

Improved query performance by refining SQL joins and indexing, reducing response latency in high-traffic modules.

PROJECTS

Unooma – AI-Powered Property Management Platform

2024 – Present

Backend Java Developer

Core backend contributor in a distributed microservice platform managing property onboarding, tenant lifecycle, lease operations, and maintenance workflows.

Designed domain-driven modules for Property and Maintenance services with clear aggregate boundaries and transactional consistency.

Performed end-to-end API integration testing across Property and Maintenance microservices ensuring reliable inter-service communication and data consistency.

Architected communication layer Designed and developed an application using Spring architecture and API.

Implemented complex transactional APIs handling property, unit, lease, and maintenance operations with optimized indexing and caching strategies.

Tested Web Services and microservice using Postman and integrated email sending services.

EDUCATION

Gita Autonomous College, Bhubaneswar

2020 – 2022

Master in Computer Application (CGPA: 8.4)

Bhubaneswar, India

CERTIFICATIONS

Programming in Java, IIT Kharagpur, NPTEL

2023

India
